PROFESSIONAL SUMMARY

Full-Stack Developer with professional experience across the PHP/Laravel and Node.js/TypeScript ecosystems. Currently building connector integrations (Magento, BigCommerce, UnoPim) for a large-scale Product Information Management (PIM) and Digital Asset Management (DAM) platform that processes bulk product data at scale. Skilled in REST API design, JWT-based authentication and role-based authorization, database and query optimization, and containerized development with Docker. Comfortable across the stack with React.js on the frontend, and focused on writing clean, maintainable, production-ready code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, PHP, HTML5, CSS3

Backend: Node.js, Express.js, Laravel 12 (PHP 8.2), Laravel Sanctum, RESTful APIs, Eloquent ORM

Frontend: React.js, Next.js, Redux, React Router, React Hook Form, Tailwind CSS, Vite

Databases: MySQL, PostgreSQL, MongoDB

E-Commerce & PIM Integrations: Magento Connector Development, BigCommerce Connector Development, UnoPim

DevOps & Tools: Docker, Git, Postman, VS Code

PROFESSIONAL EXPERIENCE

Associate Software Engineer

March 2026 – Present

Webkul Software — Noida, Uttar Pradesh

- Contributing to a large-scale Product Information Management (PIM) and Digital Asset Management (DAM) platform supporting bulk import and export of large product catalogs.
- Worked on Magento and BigCommerce connectors, synchronizing product, pricing, and inventory data between the PIM platform and both storefronts for multi-channel e-commerce.
- Contributed to UnoPim integrations, building connector and data-mapping functionality for the open-source PIM platform.
- Used Node.js and TypeScript alongside PHP/Laravel to build typed, maintainable backend services and connector modules.
- Used Docker to containerize services, standardizing local development and deployment workflows across the team.

Software Engineer

December 2024 – February 2026

Marquis Technology — Noida, Uttar Pradesh

- Provided ongoing support and maintenance for Laravel-based internal web portals, diagnosing and resolving bugs across multiple modules to improve system reliability.
- Implemented features including form handling, report generation, and request workflows.
- Managed and enhanced the Travel and Claim Portal, resolving N+1 query problems and reducing query execution time by 30%.
- Developed secure APIs for the internal MATT Tool enabling office cab tracking (odometer readings, route maps, fleet management), automating cab tracking and reducing manual logging effort by 40%.
- Maintained and updated the MarquisTech company website, including WordPress custom plugins, custom code, and content/UI updates, improving uptime and loading performance by 25%.

PROJECTS

Full-Stack E-Commerce Solution | github.com/adi3763/frontend • github.com/adi3763/backend-ecommerce

- Built a responsive single-page application using React.js, Vite, Tailwind CSS, React Router, and React Hook Form.
- Developed a RESTful Laravel 12 (PHP 8.2) API backend with Sanctum authentication, Eloquent ORM data layer, database migrations/seeding, and image handling via Intervention/Image.

EDUCATION

B.Tech in Electronics & Communication Engineering

Government Engineering College Banka, Bihar | 2020 – 2024

CERTIFICATIONS

- Programming Essentials in C++ (CPA) — Cisco | Jul 2022
- Programming Essentials in C (CLA) — Cisco | Jul 2021
- Web Development — IIT Roorkee, Skill Development Program, Grade A | 2023

LEADERSHIP & ACHIEVEMENTS

Sports Committee Head, GEC Banka — Managed sponsorships, budgets, and event coordination.
